PROFILE

Software Engineer with production experience building and deploying AI systems, fine-tuned Llama 3 with RAG, vector databases, and FastAPI inference. Full-stack background in Node.js/Python, React/TypeScript, and Azure, with AI-integrated features delivered at scale to 32,000+ users. Open to remote AI SWE roles with Australian teams.

EXPERIENCE

Associate Software Engineer

Dec 2025 – Present

Beaj · Remote

- Shipped a full CMS (React/TypeScript) for managing 3,428 learning activities across 57 courses, including a detailed editor, completeness heatmap, and filtered export pipeline
- Designed a unified Activity CRUD REST API handling 21 WhatsApp activity types (MCQ, speaking, conversational, media) with multi-file upload
- Built a Google Drive to Azure Blob sync service using BullMQ background workers, automating media management at scale
- Developed a bulk student enrollment tool (CSV preview + batch assignment) serving a 32,000+ user base
- Implemented a Dropout Risk dashboard segmenting learners into Critical / At Risk / Watch / On Track, enabling data-driven retention actions
- Refactored WhatsApp message delivery across 20+ flow files, centralizing queue pacing via BullMQ, improving reliability across 74,000+ messages

Associate Software Engineer

Jun 2025 – Dec 2025

MicroAgility APAC · Islamabad, Pakistan

- Built and delivered client-facing portals using React/TypeScript, Tailwind CSS, and ShadCN, translating design specs into fully responsive, production-ready UIs across multiple client projects
- Integrated RESTful APIs end-to-end with Zod validation schemas, enforcing data integrity across all data-entry flows

Software Engineer Intern

Nov 2024 – Apr 2025

FAIR (Football and AI Research) · London, UK

- Migrated 2GB+ of player and match data across 5 major football leagues in MongoDB with zero downtime, including schema normalization and integrity validation
- Scraped, cleaned, and mapped structured data for 10,000+ players from a third-party platform to internal API models, enabling downstream analytics features

PROJECTS

SerenityBot - Chatbot github.com/ABAbdulah/mental-health-companion.git

- Fine-tuned Llama 3 on a HuggingFace mental health dataset with a custom RAG pipeline, enabling domain-specific context-aware responses beyond the base model's capability
- Built full-stack platform: React, FastAPI inference server, vector database for semantic retrieval, and conversation analytics

ARCH360 – AR-powered Visualization Platform (Unity, C#, ARCore/ARKit) github.com/ABAbdulah/ARch360.git

- Built and shipped a cross-platform AR app in Unity (C#) for Android/iOS as a solo final year project at FAST NUCES
- Integrated an AI-driven real-time customization engine, applying ML concepts to a production-style interactive system

Bachelor's in Computer Science

2025

National University of Computer and Emerging Sciences - FAST, Islamabad, Pakistan

SKILLS

Languages

- JavaScript (ES6+)
- TypeScript
- Python
- SQL

Backend

- Node.js
- Express.js
- FastAPI
- REST APIs
- BullMQ
- Sequelize
- Microservices

Frontend

- React.js
- Next.js
- Tailwind CSS
- ShadCN
- Webpack/Vite
- HTML5/CSS3

Data & Cloud

- PostgreSQL
- MongoDB
- Redis
- MySQL
- Vector Databases
- Azure
- AWS (basic)
- Docker
- GitHub Actions
- Linux

AI / ML

- RAG
- Prompt Engineering
- Fine-tuning (Llama 3)
- LangChain
- Pandas
- Agile/Scrum
- Jest/Unit Testing
