SKILLS

Languages

JavaScript (ES6+) TypeScript
Python SQL

Backend

Node.js Express.js FastAPI
REST APIs BullMQ Sequelize
Microservices

Frontend

React.js Next.js Tailwind CSS
ShadCN Webpack/Vite
HTML5/CSS3

Data & Cloud

PostgreSQL MongoDB Redis
MySQL Vector Databases
Azure AWS (basic) Docker
GitHub Actions Linux

AI / ML

RAG Prompt Engineering
Fine-tuning (Llama 3) LangChain
Pandas Agile/Scrum
Jest/Unit Testing

EDUCATION

Bachelor's in Computer Science

National University of Computer and
Emerging Sciences - FAST
2025

PROFILE

Software Engineer with production experience building and deploying AI systems, fine-tuned Llama 3 with RAG, vector databases, and FastAPI inference. Full-stack background in Node.js/Python, React/TypeScript, and Azure, with AI-integrated features delivered at scale to 32,000+ users. Open to remote AI SWE roles with Australian teams.

EXPERIENCE

Associate Software Engineer

Dec 2025 – Present

Beaj · Remote

- Shipped a full CMS (React/TypeScript) for managing 3,428 learning activities across 57 courses, including a detailed editor, completeness heatmap, and filtered export pipeline
- Designed a unified Activity CRUD REST API handling 21 WhatsApp activity types (MCQ, speaking, conversational, media) with multi-file upload
- Built a Google Drive to Azure Blob sync service using BullMQ background workers, automating media management at scale
- Developed a bulk student enrollment tool (CSV preview + batch assignment) serving a 32,000+ user base
- Implemented a Dropout Risk dashboard segmenting learners into Critical / At Risk / Watch / On Track, enabling data-driven retention actions
- Refactored WhatsApp message delivery across 20+ flow files, centralizing queue pacing via BullMQ, improving reliability across 74,000+ messages

Associate Software Engineer

Jun 2025 – Dec 2025

MicroAgility APAC · Islamabad, Pakistan

- Built and delivered client-facing portals using React/TypeScript, Tailwind CSS, and ShadCN, translating design specs into fully responsive, production-ready UIs across multiple client projects
- Integrated RESTful APIs end-to-end with Zod validation schemas, enforcing data integrity across all data-entry flows

Software Engineer Intern

Nov 2024 – Apr 2025

FAIR (Football and AI Research) · London, UK

- Migrated 2GB+ of player and match data across 5 major football leagues in MongoDB with zero downtime, including schema normalization and integrity validation
- Scraped, cleaned, and mapped structured data for 10,000+ players from a third-party platform to internal API models, enabling downstream analytics features

PROJECTS

SerenityBot - Chatbot github.com/ABAbdulah/mental-health-companion.git

- Fine-tuned Llama 3 on a HuggingFace mental health dataset with a custom RAG pipeline, enabling domain-specific context-aware responses beyond the base model's capability
- Built full-stack platform: React, FastAPI inference server, vector database for semantic retrieval, and conversation analytics

ARCH360 – AR-powered Visualization Platform (Unity, C#, ARCore/ARKit)

github.com/ABAbdulah/ARch360.git

- Built and shipped a cross-platform AR app in Unity (C#) for Android/iOS as a solo final year project at FAST NUCES
- Integrated an AI-driven real-time customization engine, applying ML concepts to a production-style interactive system
